Hi Rick-

I wanted to let you know that unfortunately a sample from your project was compromised today. I am extremely sorry for this error on our part. We usually take great care while handling samples but today was an exception. Sample EPAMW01d-0412 (Job 18047) fell off the prep bench and the bottle is now cracked. Please let us know if we can do anything to remedy this situation, we know the importance of these samples and this study and do not take a situation like this likely. Please accept my apologies and know we will make changes to ensure that something like this does not happen in the future. Please feel free to call me if you wish to discuss this further.

Thanks,

Christy Legner
